

CAREER PROFILE

Flour Production Manager

CHS is the largest farmer-owned cooperative in the United States and one of the biggest names in **grain processing**. Grains like wheat or soy are extremely important to domestic and international trade. They are readily available crops with minimal spoilage that is easily stored, transported, and used in many food products. This is where **flour production managers** come in.

WHAT IS A FLOUR PRODUCTION MANAGER? ^{1,2,4}

Flour production managers plan, control, and coordinate all production operations, consistent with quality and product safety demands, ensuring quality and consistency of all finished flour products.

They ensure proper health and safety regulations are being adhered to throughout the production cycle.

The **flour production manager** is responsible for managing an effective, efficient, and safe operation.

These professionals determine the best way for a facility to meet the company's goals for goods, while ensuring the production stays on schedule and within an allotted budget.

They track and create production schedules according to clients' needs, specifications, and projected budgets, and discuss the logistics with their clients. Their clients include food manufacturers that use flour to produce products such like bread, baking products, glue, play dough, plywood and more!

Grain Processing refers to the set of procedures and technologies used to transform raw agricultural products, such as grains, into finished goods.
